Introduction [Sequencing Technologies] [Latest Slides from NGS Analysis Workshop] High throughput sequencing (HT-Seq or HTS), also known as next generation sequencing (NGS), presents a wide spectrum of opportunities for genome research.

RNA-Seq is a technique that allows transcriptome studies (see also Transcriptomics technologies) based on next-generation sequencing technologies. This technique is largely dependent on bioinformatics tools developed to support the different steps of the process. Here are listed some of the principal tools commonly employed and links to some important web resources.

An alternative to whole-genome sequencing is the targeted sequencing of part of a genome. Most often, this involves just sequencing the protein-coding regions of a genome, which reside within DNA segments called 'exons' and reflect the currently 'best understood' part of most genomes.

In bioinformatics, sequence clustering algorithms attempt to group biological sequences that are somehow related. The sequences can be either of genomic, "transcriptomic" or protein origin. For proteins, homologous sequences are typically grouped into families. For EST data, clustering is important to group sequences originating from the same gene before the ESTs are assembled to reconstruct ...

Welcome to TGD. TGD Wiki is a user-updatable database of information about the Tetrahymena thermophila genome sequence determined at The Institute for Genomic Research (TIGR). TGD Wiki provides information on the genome, genes, and proteins of Tetrahymena collected from scientific literature, the research community, and many other sources.. Please feel free to send comments, suggestions, or ...

As the highest-ranked open access journal in its field, Genome Biology publishes outstanding research that advances the fields of biology and biomedicine from a genomic and post-genomic perspective. Our responsive international editors provide excellent service and communication to authors throughout the entire publishing experience.

Introduction. Genomics has been revolutionized over the last 20 years by the development of first- and second-generation sequencing (SGS) technologies, enabling the completion of, among many other notable projects, the Human Genome Project , and the 1000 Genomes Project .The first method to sequence DNA was developed by Sanger in 1975 , , and another method was developed in parallel by Maxam ...

A Genome Browser is now available for the Proboscis Monkey (*Nasalis larvatus*) assembly released in November 2014 by the Proboscis Monkey Functional Genome Consortium. For more information and statistics about this assembly, see the NCBI assembly record for Charlie1.0. There are 553,412 contigs and 319,549 scaffolds in this assembly with a total size of 3,011,966,170 bases.

Results. Here we present data on the large, virulent, broad-host-range B. cereus phage vB_BceM_Bc431v3 (Bc431v3). Bc431v3 features a 158,618 bp dsDNA genome, encompassing 239 putative open reading frames (ORFs) and, 20 tRNA genes encoding 17 different amino acids.

The PDB archive contains information about experimentally-determined structures of proteins, nucleic acids, and complex assemblies. As a member of the wwPDB, the RCSB PDB curates and annotates PDB data according to agreed upon standards. The RCSB PDB also provides a variety of tools and resources. Users can perform simple and advanced searches based on annotations relating to sequence ...

NHGRI's Vision for the Future of Genomic Research

From 2000 to 2010, the speed of DNA sequencing increased 50,000-fold. Advancements in biochemical technology and bioinformatics fueled the phenomenal increase. This feature looks at a few key concepts to understand how this advancement came about. Also featured on the HHMI DVD, Viral Outbreak: The ...

While the availability of the complete genome sequence permits the identification of all potential protein products, this information could be not sufficient to allow for the identification of the subset of proteins that are in fact expressed at any stage of the life of the pathogen.
