In aviation, V-speeds are standard terms used to define airspeeds important or useful to the operation of all aircraft. These speeds are derived from data obtained by aircraft designers and manufacturers during flight testing for aircraft type-certification testing. Using them is considered a best practice to maximize aviation safety, aircraft performance or both.

So many factors are already far past the breaking point, major links in the chain of our current reality are likely to fall soon. Though the collapse of the paradigm we have formerly known is inevitable and near, the collective efforts of the already awakened could still positively alter the composition of what is unfolding.
