Category:Computer networking - Wikipedia

A computer network, or data network, is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as WiFi.. Network computer devices that originate, route and terminate the ...

Basic Networking Tutorial - a network is any collection of independent computers that communicate with one another over a shared network medium. A computer network is a collection of two or more connected computers. When these computers are joined in a network, people can share files and peripherals such as modems, printers, tape backup drives, or CD-ROM drives.

Basic Networking Tutorial - Free Computer Education

Early data links were for off-board diagnostic equipment. Diagnostic equipment was specialized and only for one module type. ALDL eventually grew to become a networking standard.
