Restoration ecology is the scientific study supporting the practice of ecological restoration, which is the practice of renewing and restoring degraded, damaged, or destroyed ecosystems and habitats in the environment by active human intervention and action.. Many people recognize that biodiversity has an intrinsic value and that we have a responsibility to conserve it for future generations.

Restoration ecology - Wikipedia

What is evolution? Evolution is a result: heredity + variation "Descent with modification" Fact: evolution has occurred Began as a hypothesis Not falsified, though falsifiable Theory: evolution is a body of explanatory principles Embodies a mechanism: natural selection, itself a result of: Variation in fitness (ability to survive to reproduce)

Molecular & Cell Biology - nyu.edu

Summary. A little over 50 years ago, Sydney Brenner had the foresight to develop the nematode (round worm) *Caenorhabditis elegans* as a genetic model for understanding questions of developmental biology and neurobiology. Over time, research on *C. elegans* has expanded to explore a wealth of diverse areas in modern biology including studies of the basic functions and interactions of eukaryotic ...

Soil biology is the study of microbial and faunal activity and ecology in soil. Soil life, soil biota, soil fauna, or edaphon is a collective term that encompasses all organisms that spend a significant portion of their life cycle within a soil profile, or at the soil-litter interface. These organisms include earthworms, nematodes, protozoa, fungi, bacteria, different arthropods, as well as ...

Supporting high quality research by the nation's leading scientists and engineers to improve EPA's scientific basis for decisions on national environmental issues.

Research Grants | US EPA

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic chemistry.

Looking for a job in biology? Pursuing a career in biology can be immensely rewarding and exciting. Studying

biology teaches us to ask questions, make observations, evaluate evidence, and solve problems. Biologists learn how living things work, how they interact with one another, and how they evolve. They may study cells under a microscope, insects in a rainforest, viruses that affect human ...

Learn about conservation of energy with a skater gal! Explore different tracks and view the kinetic energy, potential energy and friction as she moves. Build your own tracks, ramps, and jumps for the skater.

Energy Skate Park: Basics - Conservation of Energy

The 6th Conference on Natural Channels will discuss topics such as Regulatory Environment of Natural Channel System Design, Ecological Requirements for Natural Channel Systems, Tools for Designing Natural Channel Systems, Performance of Natural Channel Systems and Applying Natural Channel System Approach in a constrained system (e.g., urban, agricultural drains, mining, old dam removal or ...

Welcome to the 6th Conference on Natural Channel Systems

When the Asian chestnut blight fungus virtually eliminated American chestnut from over 180 million acres of eastern United States forests in the first half of the 20th century, it was a disaster for many animals that were highly adapted to live in forests dominated by this tree species.
