Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

So many factors are already far past the breaking point, major links in the chain of our current reality are likely to fall soon. Though the collapse of the paradigm we have formerly known is inevitable and near, the collective efforts of the already awakened could still positively alter the composition of what is unfolding.
