Our next generation of industryâ€™Industry 4.0â€™holds the promise of increased flexibility in manufacturing, along with mass customization, better quality, and improved productivity.

Intelligent Manufacturing in the Context of Industry 4.0

The effect of hot band annealing processes, namely simulating batch annealing and continuous annealing, on microstructure, texture, grain boundary character and r-value of ferritic stainless steel was investigated. The hot band displayed a highly elongated ribbon-like structure and a pronounced deformation texture.
