HIGH SPEED MACHINING (HSM) – THE EFFECTIVE WAY OF MODERN

Machining is any of various processes in which a piece of raw material is cut into a desired final shape and size by a controlled material-removal process. The processes that have this common theme, controlled material removal, are today collectively known as subtractive manufacturing, in distinction from processes of controlled material addition, which are known as additive manufacturing.

Machining - Wikipedia

Abstract Necessity to use new materials, demanding functional requirements and miniaturization have led to evolution of modern manufacturing processes.
