Software quality according to Feigenbaum. Quality is a customer determination, not an engineer's determination, not a marketing determination, nor a general management determination.

Software quality - Wikipedia

Quality management ensures that an organization, product or service is consistent. It has four main components: quality planning, quality assurance, quality control and quality improvement. Quality management is focused not only on product and service quality, but also on the means to achieve it. Quality management, therefore, uses quality assurance and control of processes as well as products ...
